demEAUmed Final Conference

May 18th 2017, Barcelona

demEAUmed Overview

demEAUmed is a European water innovation project which started officially on January 1st, 2014 for over 42 months(2014-2017). Seven countries are establishing this project: Austria, Belgium, France, Germany, Italy, Netherlands and Spain.

The aim of the project is to involve tourist and water industry representatives, policy-makers, research centres and other stakeholders **to demonstrate and promote the Integration of water innovative technologies in tourist facilities** leading to their eventual **market uptake** and **reduction of water consumption**, aiming at **safe closed water cycles in Euro-Mediterranean tourist facilities**.

demEAUmed Consortium

Why attend our final conference?

During the event, the results, benefits and opportunities of demEAUmed technologies in **managing and recycling water** will be presented and discussed. One of the aims of the conference is to involve different stakeholders to demonstrate and promote innovative technologies to **reduce the impact of tourism sector on the environment**.

Hotel owners will be able to use the developed Decision Support System to **assess how much water savings they could achieve** as well as the **associated environmental impacts**. Furthermore, the private sector will have the chance to discuss with the technology providers the possible **exploitation opportunities**. Participants will have the chance to visit the demonstration site! To register, [click here](#).
